# IFM Network Performance Metrics

April 30, 2003

# IFM Network Performance

■ **Significant events**

- On the weekly chart you can see the migration of the STaRS backup to the NACC backup network
- ARC go-live did not present any noticeable network utilization

Notes: Average bits in (Green) refers to bits out of IFM Network.
Average bits out (blue) refers to traffic coming into the IFM network.
(Stats are taken from WAN Router)

# IFM Network Stats
(Weekly and Monthly)

Notes: Average bits in (Green) refers to bits out of IFM Network.
Average bits out (blue) refers to traffic coming into the IFM network.
(Stats are taken from WAN Router)
